

PRODUCT SHEET: WH3

Resilient Wall Brace

WH3 is a Resilient Wall Brace used to isolate a wall from an adjacent support.

SYSTEM FEATURES:

- Standard wall tie designed to take a horizontal load of 0 to 200N with a design load of 100N
- Cost effective
- Easy to install
- Minimum void depth between walls is 41mm
- Steel parts are Zinc plated
- Other types available upon request.

REQUIREMENTS:

To specify which WH3 wall tie you require, our engineers will need to know:

- Decoupled structure is supported or not
- Horizontal and vertical loads
